

Achieve total control over your tooling and asset inventory

Tooling inventory management software to boost precision, productivity, and profits.

 **CRIBWISE**

Simplifying tool and asset inventory management for industrial businesses

CRIBWISE is a cloud-based tooling and asset inventory management software that streamlines how businesses track and manage their assets. Suitable for companies of all sizes across industries, CRIBWISE ensures that the right tools and assets are always available when needed, with real-time visibility to enhance efficiency, reduce costs, and minimize downtime.

CRIBWISE is fully brand and asset agnostic, capable of managing a diverse range of tools and small assets, regardless of their brand or type. It can be used independently or integrated with leading storage and vending systems to offer a complete solution. The software also offers detailed reports to support data-driven decision-making and optimize asset lifetime and utilization – saving businesses valuable costs.

Backed by over 100 years of expertise as part of the global Sandvik Group, CRIBWISE is a trusted, reliable solution available worldwide and supported by a global partner network.

Increase productivity

By having the right tool in the right place at the right time, employees can work faster and more efficiently, driving overall productivity.

Simplify operations

Streamline inventory management processes across multiple sites, freeing up time for other important operational tasks and reducing manual work.

Automated replenishment

CRIBWISE can automate tool ordering when stock levels run low, ensuring that the tools are always available when needed without manual intervention.

Improve cost control

Minimize overstocking and reduce unnecessary purchases by gaining precise insights into asset usage and inventory levels.

Reduce inventory losses

Track and manage tooling and small assets more effectively, preventing loss or misuse and ensuring your investment is protected.

Maximize asset utilization

Maximize the life cycle and productivity of tools and assets by ensuring they are used efficiently and effectively across all operations.

Enhance decision-making

Make more informed decisions with detailed, data-driven reports that provide a clear picture of inventory trends and asset performance.

Ensure compliance and traceability

Stay compliant with industry standards and ensure full traceability of all assets, helping mitigate risk and maintain audit readiness.

Scale with ease

CRIBWISE adapts to your business size and needs, allowing you to scale your inventory management as your operations expand.

Streamline your tooling, order, and inventory management

Tool management

CRIBWISE offers powerful tooling management capabilities that help businesses track, optimize, and report on their tools and assets in real-time, across multiple sites and locations.

With advanced features like usage tracking, condition monitoring, and detailed analytics, CRIBWISE ensures that your tools are always in the right place at the right time. This enables informed decision-making, reduces waste, and improves productivity across your operations.

Real-time tool tracking

Monitor the location, usage, and condition of every tool for better management and reduced downtime

Tool condition monitoring

Track the health of tools and schedule maintenance or replacement based on usage data

Usage analytics

Gain insights into tool performance and utilization to optimize processes and reduce waste

- **Tool manufacturer catalog services:** Access a comprehensive digital catalog of tools from leading manufacturers, ensuring you can easily manage and track all the tools in your inventory.
- **ISO 13399 compatibility:** Seamlessly integrate and manage tooling data using the ISO 13399 standard, ensuring industry-standard compatibility for all your cutting tools.
- **Spare part management:** Efficiently track and manage spare parts for your tools, reducing downtime and improving tool longevity.
- **ToolsUnited catalog service (subscription required):** Gain access to the ToolsUnited catalog service, offering a wide range of cutting tools and related products to simplify procurement and inventory management.

Order management

With CRIBWISE's order management system, you can automate and streamline purchasing and service processes, minimizing administrative time and errors.

The system allows you to track orders, manage suppliers, and optimize stock replenishment – across multiple sites and locations as required. This ensures you always have the right materials and tools when needed, preventing costly delays and ensuring smooth production flow.

Automated ordering

Set up automated purchase orders to replenish stock based on real-time usage data

Supplier management

Easily track supplier details, delivery times, and cost, simplifying order decisions

Order tracking

Gain full visibility of all orders from creation to delivery, ensuring nothing falls through the cracks

- **Automated ordering:** Set up automated purchase orders based on real-time inventory levels and usage data, ensuring you never run out of essential tools and materials.
- **Work order management:** Simplify work order creation and management, allowing for efficient tracking of tool usage, maintenance, and service schedules.
- **ERP integrations:** Seamlessly integrate with your existing ERP system, ensuring smooth data flow and reducing manual entry errors.
- **API capability:** Easily connect CRIBWISE to other systems and platforms with robust API functionality, enabling custom integrations for enhanced flexibility.
- **Customizable purchase order templates:** Tailor purchase order templates to meet your specific business needs, streamlining the procurement process and reducing administrative overhead.

Inventory management

CRIBWISE helps businesses take control of their inventory with real-time stock monitoring, automated reordering, and alerts when stock levels fall below critical thresholds.

This feature helps prevent overstocking, reduce capital tied up in excess inventory, and ensure materials are available when needed. With detailed reporting and trend analysis, CRIBWISE empowers better decision-making and supports cost-effective inventory management.

Real-time stock monitoring

Track inventory levels in real time and receive alerts for low stock or excessive inventory

Automated reordering

Automatically reorder stock based on set thresholds to maintain optimal inventory levels

Inventory reporting and trends

Use detailed reports to analyze stock trends, usage patterns, and optimize inventory performance

- **Stock management:** Maintains optimal inventory levels, preventing both overstocking and stockouts.
- **Asset control:** Tracks and manages physical assets to ensure proper use and maintenance.
- **Inventory classification:** Categorizes products for better prioritization and resource allocation.
- **Supplier access management:** Organizes and secures communication with suppliers for smooth operations.
- **Reporting and analytics with real-time dashboards:** Provides instant insights for data-driven decisions and operational adjustments.

Integrations

Comprehensive integrations

CRIBWISE continually expands its integration capabilities that enhance the user experience and unlock additional business potential. By partnering with industry leaders, CRIBWISE integrates with a wide range of systems, from ERP and MES solutions to advanced storage and vending systems. These integrations streamline inventory management, automate processes, and improve overall efficiency.

As CRIBWISE continues to expand its integration capabilities, users can expect even more ways to connect with existing systems, ensuring that every aspect of asset and inventory management is as efficient and seamless as possible. CRIBWISE is committed to shaping the future of tooling and asset management with innovative, connected solutions.

Scalable solutions to suit your business needs

CRIBWISE tooling and inventory management software offers the ultimate flexibility, whether used independently or integrated with industry-leading storage and vending systems.

As a standalone solution, CRIBWISE delivers real-time tracking and detailed insights into your tooling, small assets and inventory, helping you maintain optimal stock levels and reduce loss.

When paired with advanced storage solutions, it enhances the efficiency of your operations, allowing for seamless asset dispensing, retrieval, and replenishment.

From secure cabinets and tool cribs to modular options, larger lift systems and advanced vending solutions, CRIBWISE integrates seamlessly with most storage systems and brands, ensuring you can maximize your existing setup while enhancing inventory control and accessibility.

Software only installation

If any of these statements below describe your operations, a software only installation could be ideal – giving you complete data, functionality and automation for a streamlined inventory.

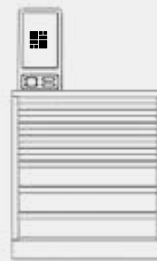

- Have proven processes
- Smaller workforce
- Smaller facilities, fewer machines
- Lower value inventory
- Existing hardware installation: capable of integration

Software and Hardware

If proximity and security are your top priorities and if any of the statements below apply to your operations, a software and hardware solutions is right for you.

- Require process development
- Larger workforce
- Larger facilities, more machines
- Higher value or specialized inventory
- No existing hardware and / or no integration possible

Software Only

CRIBWISE Starter

Cloud software solution

Software + Hardware

CRIBWISE Professional

Cloud software with storage solution

Tailored Solutions

CRIBWISE Enterprise

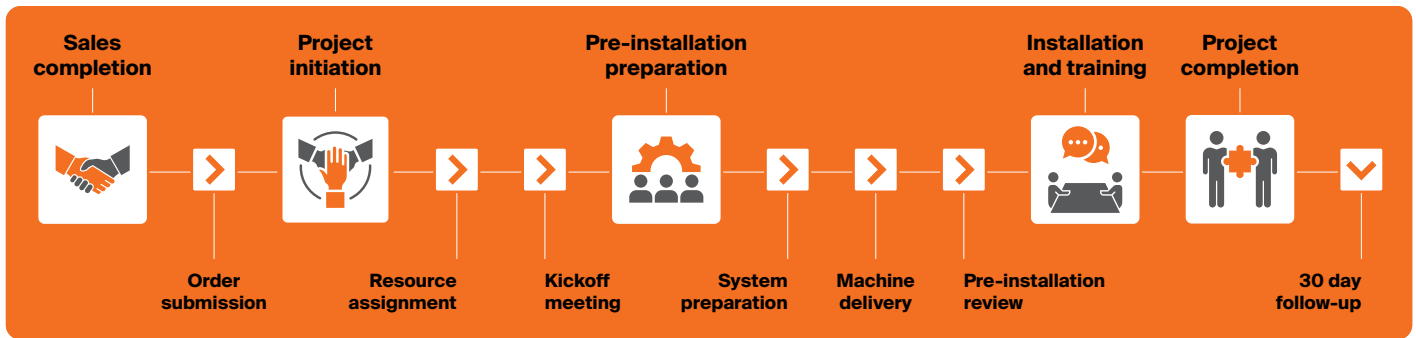

Cloud or on premise storage solution

| Features | Starter | Professional | Enterprise |
|---------------------------------|---------|--------------|------------|
| Cloud software | ✓ | ✓ | ✓ |
| Cabinets with controlled access | ∅ | ✓ | ✓ |
| Cabinet offline capability | ∅ | ✓ | ✓ |
| On premise software | ∅ | ∅ | ✓ |

Seamless and smooth setup

A smooth installation and onboarding experience is crucial for maximizing the capabilities of CRIBWISE. We support customers in getting up and running swiftly, providing thorough and effective training to ensure businesses can start experiencing the full business benefits of the solution as soon as possible.

Installation and onboarding process

We believe that successful installation and onboarding are achieved when the customer:

- Feels supported and guided throughout the onboarding journey
- Develops a comfortable level of confidence in using the solution
- Begins to recognize the initial value from the solution.

Please note: For every installation and onboarding project, a distinct set of activities may be necessary. The assessment of these requirements will be conducted on a project-by-project basis.

Packages to suit your business

We offer various installation and onboarding packages depending on the customer's needs, and with each we promise to deliver:

- A proven, ready-to-use solution
- Support with data imports and setting configurations
- Training on the full solution – software and hardware
- Opportunity for post-installation follow up
- Assurance of successful implementation.

| Package | What's included |
|---|---|
| Customer Onboarding and Installation: for new cloud-based customers | Two-day, in-person, onsite installation and training session |
| Customer Onboarding and Installation: for new on-premise customers | Three-day, in-person, onsite installation and training session |
| Customer Installation: Expansion | For existing Cloud-based and On-Premise CRIBWISE customers with previously installed portal – looking to expand with new main or extension machines. Includes a one-day, in-person, onsite installation and introductory training session |

Success stories

Valmet, a Finnish paper industry supplier, implemented CRIBWISE to control tooling and consumables at its Karlstad facility, reducing manual labor by 8 hours weekly and cutting consumable use by 50%. The system automated stock ordering, reduced waste, and will expand to track 1,000 items and tool maintenance at more locations.

Sävjo Plastic, a Swedish manufacturer, implemented CRIBWISE to automate inventory management, reducing search time, optimizing storage, and improving efficiency. The system supports their growth by streamlining operations and reducing admin tasks.

Sandvik Mining and Rock Solutions used CRIBWISE to streamline tooling, cutting tool acquisition time by 68% and reducing costs by up to 10%. The system also decreased PPE consumption by 40% and inventory by 30%, while automating purchasing and admin tasks, improving cost control.

The Latin American division of a leading global healthcare manufacturer adopted CRIBWISE to manage drill bit use in surgical equipment production, saving \$27,000 in five months. The system automated tracking and ordering, reduced administrative costs, and helped eliminate paper documentation.

Fårbo Mekaniska, a Swedish machining company, used CRIBWISE to optimize tool inventory, saving 2,000 hours annually on tool searches and reducing costs by SEK 700,000 to 1,000,000. The system also saved 135 hours per year, boosting productivity and tool availability.
