

General

The SANDVIK CRIBWISE interface connects to the SANDVIK CRIBWISE system.

Communication

Communication with the SANDVIK CRIBWISE system is via network using REST interface and WEB API methods. HTTPS is used as the communication protocol. The data format of the user data is JSON.

Functionality

- Transfer of articles to SANDVIK CRIBWISE.
- Transfer of withdrawal orders when withdrawing to SANDVIK CRIBWISE (Items are returned via SANDVIK CRIBWISE, there is no circulation control at ZOLLER).
- Manual import of articles, storages and stocks from SANDVIK CRIBWISE.
- Periodic automatic import of articles, storages and stocks from SANDVIK CRIBWISE by ZOLLER Windows Service SCIS (SANDVIK CRIBWISE Import Service).

Notes:

- A SANDVIK CRIBWISE storage (device) exists at ZOLLER as a storage without storage location information. The exact storage location of the items within the storage is not known at ZOLLER.
- If different article types are to be transferred (accessories, components, tools, fixtures), the identification numbers must be unique across article types.

Requirements

- TMS Tool Management Solutions »Silver« from version 1.19.0.
- Integration into the customer network.

The requirements are NOT included in the scope of delivery of the interface.

Miscellaneous

Installation/commissioning of the SANDVIK CRIBWISE interface is not included in the price offered and will be charged separately according to time and effort and in accordance with the applicable installation guidelines.
